

## New Year and Christmas holiday in the village of Volosovo

Successfully implemented a large project - New Year and Christmas in the village of Volosovo! Several Y 's Men clubs of St. Petersburg, the club Ingria among them, have combined their efforts for this.

The holiday of Christmas and New Year was organized for large families and families who found themselves in a difficult life situation. 268 children received gifts.

We drove more than 200 km round trip to get to the village of Volosovo, Leningrad Region. We again organized a caravan of several cars to deliver gifts and all the volunteers.

The holiday was like this: in the lobby of the club guests were greeted by artists, at the New Year tree volunteers played with children and painted funny masks on their faces. In the performance were very original artists. The children themselves could take part in the show. Grandfather Frost and Snow Maiden came to visit the children. They danced and played with children at the New Year tree.

At the end of the holiday, each child received a gift. The organizers approached the choice of gifts very responsibly. On each gift you can see the photo and the name of the child. This was done so that every child knows that Santa Claus knows about him and came to him.

Gifts were very different. One girl really wanted to get a hamster. A large family needed a sports simulator. The twin family needed a double sled. Teenage boys like bicycles, skis or snowboards. For a family, these things are very expensive and they cannot buy such things on their own. Therefore, our organizers learned in advance information about the real needs of each family.

The children came to the festival very elegant; many of them were in carnival costumes.

Of course, all children love sweets. Therefore, each of them received a sweet gift - a box of chocolates with a picture of the symbol of 2019 - Little Pig!
